GLOBAL CSR is employing an IT intern - Fall 2017

What if it was possible to develop a software that could actually change the world? A software that could put human rights in the hands of everyone on a global scale. And be so cost-efficient that it would cost less than even a phone subscription. Well guess what, we have! And you're invited to put your substantial fingerprint right in the middle of the engine running it.

If that seems like something you would like to make part of your life experience, then become an IT intern in our consultancy firm advising companies on how to comply with internationally agreed upon principles on how to respect human rights as a business. GLOBAL CSR is a leading Copenhagen-based Corporate Social Responsibility (CSR) consultancy firm specialized in business and human rights i.e. social sustainability. We ensure that corporations respect human rights, as a key element of CSR. Early 2016, we released the first set of cloud applications to allow corporations to assess and manage their impacts on human rights in alignment with the global authoritative standard; the UN Guiding Principles on Business and Human Rights. *The tool is the first of its kind in the world, and still remains the only such tool available.* You can learn more about our work at www.globalcsr.net and about our cloud applications at www.csrcloud.com/products.

We are looking to take on board an intern with an IT-specialised academic background for a *six months internships* starting August 1st 2017.

YOUR TASKS MAY INCLUDE

- Database structuring & management
- Security analysis & planning
- Research, write & analyse current and future solutions
- Internal & external communication
- Participate in sales and marketing
- Strategy development
- Office / administration / logistics work

You will be working directly with our Head of Product Development as well as with the CSR advisers and other interns on the further development of our cloud applications. This will include assistance with project planning and management for ongoing and strategic future developments, database management and structuring, as well as programming tasks. You will get hands-on experience with one of the most powerful cloud application platforms available and have the opportunity to provide influential input on the future development and deployment structure on world leading data centres. You will also get a solid insight in the principles-based approach to CSR and gain experience of turning this into a digitalized assessment and management system. You will receive training in CSR and the IT platforms along the way and together we will continuously evaluate your experience. This is a fulltime position (37 hours a week) located in Vanløse, Copenhagen. GLOBAL CSR only offers unpaid internships, however a daily lunch, tea/coffee and snacks are provided.

REQUIREMENTS

- Practical/academic experience with *database management, javascript, html, css*
- iOS and Android development skills are appreciated, but not required.
- Interested in CSR and development of business-management oriented applications
- Understand and write English at a higher level / Bi-lingual Danish-English preference
- Highly motivated team player with strong attention to detail
- Enrolled in an education programme throughout the internship *(Applicants who have finished their studies or will finish during the internship will not be considered.)*

INTERESTED?
